

Training & Workshops

Discipline	Course Name	Days	Audience
Agile	Product Owner Enablement	1	Business Product Owners, Team Leads
	Developing Agile Requirements with User Stories (or Use Cases)	2	Entire Project Team
	Applying Scrum with User Stories (or Use Cases)	2	Entire Project Team
	Agile Estimating & Planning	2	Entire Project Team
	Testing Agile Projects	1	Testers, test leads, developers, project managers, architects, and systems analysts
Project Management	Iterative Project Management with the Unified Process	2	Project Managers, Tech Leads
	Advanced Iterative Project Management Workshop	1-2	Project Managers, Tech Leads (<i>Training and workshop in 2 day format</i>)
	Service Oriented Architecture for Managers	2	Technology VP, CTO, CIO, Enterprise Architects, Project Managers, Tech Leads
Software Process	Introduction to the Unified Process	2	Entire project staff
	Unified Process Overview	1/2	Entire project staff
Service Oriented Architecture (SOA) & Web Services	Introduction to Service Oriented Architecture	1	Architects, designers, managers, developers, tech leads, quality assurance
	Service Oriented Architecture & Web Services	2	Designers, developers, tech leads
	Service Oriented Architecture for Managers	2	Project managers, tech leads
	Service Oriented Architecture for Architects	2	Technical Architects, Enterprise Architects

Discipline	Course Name	Days	Audience
Requirements	Business Modeling using UML	3	
	Defining & Managing Requirements with Use Cases	2-3	Business Analysts/Requirements Analysts, Project/Team Leads, Technical Leads, Systems Engineers, QA, Testers
	Requirements Elicitation & Facilitation	2-3	
	Advanced Use Case Lab	2	
	Service-Oriented Analysis	2	
<i>IIBA endorsed</i>	Effective Use Case Development	2	Business Analysts interested in preparing for IIBA CBAP™ examination via IIBA endorsed courses
<i>IIBA endorsed</i>	Business Analysis – Requirements Discovery and Facilitation	2	
	IIBA CBAP Certification Boot Camp	4	
	Use Case Overview [virtual or on-site presentation]	1/2	Business Analysts/Requirements Analysts, Project/Team Leads, Systems Engineers, QA, Testers
	Testing Use Case-Driven Projects	2	QA, Testers, Technical Leads, Test Managers, Business Analysts, Project Managers, Developers
	Introduction to Use Cases	1	Entire software development team
	* Facilitated Use Case Workshop	1-5	Entire project team. <i>IconATG facilitator leads team developing project artifacts. Workshops can be held in conjunction with on-site skills training for maximum effectiveness.</i>
Usability	User Centered Design	2	Interface/web designers, information architects, project managers, business/requirements analysts, technical writers, quality assurance, testers

Discipline	Course Name	Days	Audience
Analysis & Design	Introduction to Modeling using UML	2	Entire project staff
	Analysis & Design using UML	5	Systems analysts, tech leads, designers, modelers, software engineers, architects
	Analysis using UML	2	Systems analysts, tech leads, designers, modelers, software engineers, architects
	Design using UML	3	Architects, tech leads, designers/modelers, subject matter experts
	Analysis Modeling Workshop (UML)	1+	Architects, tech leads, designers, developers
	Design Modeling Workshop (UML)	1+	Systems analysts, designers, software engineers, developers, architects
	Agile Modeling Workshop	1+	Entire project staff
NOTE: Modeling courses can be taught with your selected tool, such as RSA, RSM, Together, Enterprise Architect, XDE, Rose, or Visio.			
Rational Tools Workshops	Rational Team Concert (for Contributors and Developers)		
	Rational Quality Manager and Testing Tools		
	Rational Requirements Composer		Flexible, hands-on tool enablement that can be customized to your specific project needs.
	RequisitePro and DOORS		
	Rational Software Architect		
	Rational Software Modeler		
	Rose		
	ClearCase		
	ClearQuest

17 Year Training Stats:

Over 20,000 students
700+ courses delivered
300+ companies

Why IconATG?

- < Consulting, mentoring and developing/providing training programs for large IT organizations since 1992
- < Full software lifecycle curriculum with cost-effective, tailored courses with seasoned instructors, qualified through hands-on experience
- < Skilled in tools selection and deployment, organizational transformation via process, technology and culture
- < Proven experience tailoring and extending iterative SDLC processes (RUP, Agile, Scrum, XP, OpenUP, Essential UP)
- < Experienced mentors and consultants with demonstrated project success

IconATG is a thought-leader in IT training, consulting and mentoring. Our training team has successfully developed cost-effective, customized IT training programs and we have taught thousands of students through our formal courseware and hands-on workshops. We offer introductory to advanced courses in focused disciplines of the full software lifecycle including Iterative, Agile, Unified Process (RUP), Scrum, UML, requirements and Use Cases, facilitation, user-centered design, iterative project management, and architecture (SOA/MDA). Our instructors' real-world expertise is incorporated in each of our classes, giving your team practical skills to be highly productive when developing today's most demanding applications.

Mentoring solidifies knowledge gained through training by applying concepts learned in class. Icon's extensive project experience has shown that teams better understand new processes and techniques by applying them with an experienced mentor. IconATG consultants and mentors work with project teams applying new technologies, tools and processes in their organizations to ensure project success. Full lifecycle experience allows Icon consultants to deliver expert knowledge in specific disciplines, while providing an understanding of the workflow throughout the lifecycle. We actively work with your project team helping them develop skills and address problems through facilitation, demonstration, co-development, review, observation and advice. IconATG is that critical consulting resource – we help ensure your success!
